

# SMART3G-C2

Intrinsically safe detector

Datasheet

SMART3G-C2 gas detector is designed to meet industrial requirements; the enclosure is explosion proof and can be installed in ATEX Zone 1 and, when equipped with dust adapter, in Zone 21. To detect particular toxic gas, the sensing element must be directly exposed to the mixture. In this condition the protection mode is guaranteed by a galvanic separation of the electronics in the sensor head and in the enclosure. The galvanic separation fulfils the requirements for the intrinsically safe protection mode. The sensing element is placed in the stainless steel head with a 48 mm diameter. The electrochemical cell is used to detect toxic gas, due to the optimal performance in these applications. The gas detector has a 12-24 Vdc power supply and a standard 4-20 mA 3-wires output. Optionally, the SMART3G-C2 can be equipped with serial RS485 communication and a 1 or 3 relays board. The aluminium enclosure has dimensions 138 x 200 x 119 mm, with 3 cable entries 3/4" NPT threaded.

The gas detector can be ATEX marked as follows:

CE 0722 Ex II 2G Ex db [ib] ib IIC T6 Gb

Or, when equipped with dust adapter:

CE 0722 Ex II 2GD Ex db [ib] ib IIC T6 Gb  
Ex tb IIC T85°C Db  
IP65

The gas detector is IECEx compliant and can be marked as follows:

Ex db [ib] ib IIC T6 Gb

Or, when equipped with dust adapter:

Ex db [ib] ib IIC T6 Gb  
Ex tb IIC T85°C Db  
IP65

SMART3G-C2 is SIL2 hardware and SIL3 software; with a redundant system also the hardware is SIL3.
